## Frontend CRC Cards

Login Page	
Parent: none Subclass: Signup Page	
Responsibilities: <ul style="list-style-type: none"><li>• Allow users who are registered to go to their profile page to see their posts and events.</li><li>• Users who are unregistered can go to the signup page to sign up for an account.</li></ul>	Collaborators: <ul style="list-style-type: none"><li>• Signup Page</li><li>• Profile Page</li></ul>

Signup Page	
Parent: Login Page Subclass: none	
Responsibilities: <ul style="list-style-type: none"><li>• Allow unregistered users to sign up for a new account using their UofT email so they can make posts and events.</li></ul>	Collaborators: <ul style="list-style-type: none"><li>• Login Page</li></ul>

Profile Page	
Parent: Login Page Subclass: Navigation Bar	
Responsibilities: <ul style="list-style-type: none"> <li>• Logged-in users can see their profile information and all the posts they made about events and items they want to sell or buy.</li> </ul>	Collaborators: <ul style="list-style-type: none"> <li>• Login Page</li> <li>• Navigation Bar</li> </ul>

Navigation Bar	
Parent: Profile Page Subclass: none	
Responsibilities: <ul style="list-style-type: none"> <li>• Logged-in users can go to different pages by clicking on the subtext in the bar</li> </ul>	Collaborators: <ul style="list-style-type: none"> <li>• Profile Page</li> <li>• About Page</li> <li>• Market Page</li> <li>• Event Page</li> <li>• Message Page</li> </ul>

Event Page	
Parent: Profile Page Subclass: Navigation Bar	
Responsibilities: <ul style="list-style-type: none"> <li>• Logged-in users can see the events that have been posted.</li> </ul>	Collaborators: <ul style="list-style-type: none"> <li>• Post Event Page</li> <li>• Event Details Page</li> <li>• Navigation Bar</li> </ul>

Post Event Page	
Parent: Event Page Subclass: Navigation Bar	
Responsibilities: <ul style="list-style-type: none"> <li>• Logged-in users can post their own events and the created events can be found in Event Page</li> </ul>	Collaborators: <ul style="list-style-type: none"> <li>• Event Page</li> <li>• Navigation Bar</li> </ul>

Event Details Page	
Parent: Event Page Subclass: Navigation Bar	
Responsibilities: <ul style="list-style-type: none"> <li>• Logged-in users can see the details of the event (description) by clicking the square box in the Event Page</li> </ul>	Collaborators: <ul style="list-style-type: none"> <li>• Event Page</li> <li>• Navigation Bar</li> </ul>

Market Page	
Parent: Profile Page Subclass: Navigation Bar	
Responsibilities: <ul style="list-style-type: none"> <li>• Logged-in users can see the items that have been posted.</li> </ul>	Collaborators: <ul style="list-style-type: none"> <li>• Post Item Page</li> <li>• Item Details Page</li> <li>• Navigation Bar</li> </ul>

Post Item Page	
Parent: Market Page Subclass: Navigation Bar	
Responsibilities: <ul style="list-style-type: none"> <li>• Logged-in users can post their own product in the market and users can see the products in the market page</li> </ul>	Collaborators: <ul style="list-style-type: none"> <li>• Market Page</li> <li>• Navigation Bar</li> </ul>

Market Details Page	
Parent: Market Page Subclass: Navigation Bar	
Responsibilities: <ul style="list-style-type: none"> <li>• Logged-in users can see the details of the items by clicking the square box in the Market Page</li> </ul>	Collaborators: <ul style="list-style-type: none"> <li>• Market Page</li> <li>• Navigation Bar</li> <li>• Comment Section</li> </ul>

Comment Section	
Parent: Market Page Subclass: Navigation Bar	
Responsibilities: <ul style="list-style-type: none"><li>• Logged-in users can see the comments of the product and post their comments</li></ul>	Collaborators: <ul style="list-style-type: none"><li>• Market Page</li><li>• Market Details Page</li><li>• Navigation Bar</li></ul>

## Backend CRC Cards

User	
Parent/Subclass: None	
Responsibilities: <ul style="list-style-type: none"><li>• Provides model/schema for users for the app</li></ul>	Collaborators: <ul style="list-style-type: none"><li>• MongoDB database</li><li>• Event</li><li>• Item</li></ul>

Event	
Parent/Subclass: None	
Responsibilities: <ul style="list-style-type: none"><li>• Provides model/schema for events created by users for the app</li></ul>	Collaborators: <ul style="list-style-type: none"><li>• MongoDB database</li><li>• User</li></ul>

Item	
Parent/Subclass: None	
Responsibilities: <ul style="list-style-type: none"><li>• Provides model/schema for marketplace items created by users for the app</li></ul>	Collaborators: <ul style="list-style-type: none"><li>• MongoDB database</li><li>• User</li></ul>

Backend API	
Parent/Subclass: none	
Responsibilities: <ul style="list-style-type: none"> <li>• Handles all endpoints for authentication, log in, register</li> </ul>	Collaborators: <ul style="list-style-type: none"> <li>• Server</li> <li>• Router (auth.js, users.js, events.js, etc)</li> </ul>

Router	
Responsibilities: <ul style="list-style-type: none"> <li>• Route configs are responsible for initializing and associating routes with controllers.</li> <li>• Handling HTTP Requests and Responses.</li> </ul>	Collaborators: <ul style="list-style-type: none"> <li>• Client</li> <li>• MongoDB database</li> <li>• Server</li> </ul>

Events Routing	
Parent/Subclass: None	

Responsibilities: <ul style="list-style-type: none"> <li>• Route configs are responsible for initializing and associating routes with controllers.</li> <li>• Handling HTTP Requests and Responses.</li> </ul>	Collaborators: <ul style="list-style-type: none"> <li>• MongoDB database</li> <li>• User Schema Model</li> <li>• Event Schema Model</li> </ul>
--	--

Items Routing	
Parent/Subclass: None	
Responsibilities: <ul style="list-style-type: none"> <li>• Route configs are responsible for initializing and associating routes with controllers.</li> <li>• Handling HTTP Requests and Responses relating to marketplace items</li> </ul>	Collaborators: <ul style="list-style-type: none"> <li>• MongoDB database</li> <li>• User Schema Model</li> <li>• Event Schema Model</li> </ul>
